

**NONURGENT PROBLEMS:**

- It is normal for the outermost surface of temporary fillings to wear over time; replacement is indicated only if the filling is dislodged and saliva is leaking into the tooth.
- A draining "bump" develops on the gum near the tooth.
- A "high filling" which may require adjustment.

**URGENT PROBLEMS:**

- Acute pain unrelieved by medication!
- Swelling inside the mouth!
- Swelling outside the mouth, especially around the eye!
- Call our office at (405) 455-2552
- After normal office hours please call (405) 919-8934
